Technology Ireland
March/April 2009

G

overview that the current economic downturn is of little threat at the raft end of these figures. In the face of this, the government has announced a range of measures to stimulate the economy and encourage investment. These measures include a significant increase in government spending, which is expected to boost economic growth.

The questions that need to be answered are:

- What can we do to ensure Ireland's future?
- How can we ensure that the measures taken are effective and sustainable?

From our position as an active player in the global technology sector, we are aware of the importance of innovation and collaboration. The Irish government has been proactive in supporting the development of a world-class technology sector. This has resulted in a strong economy and a high level of employment.

As director of Capacity Ireland, I am committed to ensuring that Ireland remains a global player in the technology sector. We believe that by fostering a culture of innovation and collaboration, we can ensure that Ireland remains a competitive and attractive destination for businesses and talent.

In the current economic climate, it is more important than ever to focus on developing the skills and capabilities of our workforce. We must ensure that our education system is aligned with the needs of the technology sector, and that our workforce has the skills required to succeed in this rapidly evolving industry.

One area where we can make a real difference is in the area of research and development. By investing in research, we can ensure that Ireland remains a leader in the development of new technologies and solutions.

We are committed to working with businesses and organizations to ensure that Ireland remains a competitive and attractive destination for innovation and collaboration. We believe that by working together, we can ensure that Ireland remains a leader in the global technology sector.

Another element of our remit is to make the most of Ireland's natural resources in a technology context.

In other areas, we see opportunities for growth and development, such as in renewable energy and sustainable technologies. We are committed to working with businesses and organizations to ensure that Ireland remains a leader in these areas.

In summary, we see great potential for growth and development in the technology sector in Ireland. We are committed to working with businesses and organizations to ensure that Ireland remains a competitive and attractive destination for innovation and collaboration.

We believe that by working together, we can ensure that Ireland remains a leader in the global technology sector.
